

Work smarter, not harder.

Silver King mobile and meatwell freezers allow operators to stock, move, and position key ingredients throughout the kitchen. Crew members can easily roll the mobile unit into the storage freezer to restock, which reduces excessive lifting and transport while ensuring optimal temperatures from storage to the point of use. Whether you're near a fryer, grill, or ice cream station, Silver King mobile freezers position ingredients where you need them, when you need them.

- Environmentally friendly R290 refrigerant
- Stainless steel exterior with galvanized bottom
- Stainless steel interior with coved corners and finished edges
- Easy top access
- Mobility

In the foodservice business, positioning product near points of use can be challenging, and so can unnecessary traffic patterns in the kitchen. Adding mobility to your operation allows crew to quickly restock and position key ingredients around your cooking equipment, prep stations, and other point-of-use locations. If you are looking to streamline your kitchen operations, Silver King mobile freezers are the solution.

Improved Efficiency

Adding mobility reduces food contamination, crew injuries, and lost time between tasks by minimizing unnecessary movements within the kitchen — saving time, money, and excess labor.

Eco-Friendly Refrigerant

All Silver King equipment features R290 refrigerant, one of the most environmentally friendly choices with a global warming potential (GWP) of 3. R290 is proven safe, readily available, and familiar to service teams.

Easy to Clean

The stainless interior with coved corners, finished edges, plus removeable lids make cleaning simple.

Crew-Proof Construction

Designed for the harshest commercial kitchen environments with a stainless steel exterior and interior, galvanized bottom, and heavy-duty casters.

High-Density Insulation

Foamed-in-place, CFC-free polyurethane insulation keeps cold air in while strengthening the unit — improving overall cost savings.
