

Increase speed of service with a shelf refrigerator.

Silver King shelf refrigerators are designed for countertop placement and help fast-track service without requiring the investment of a full-size solution. These cost-effective, lightweight refrigerators allow restaurants to streamline order pickup and delivery services by positioning cold food and beverage items right at checkout and pickup locations.

- Compact and lightweight
- Environmentally friendly R290 refrigerant
- Stainless steel exterior with galvanized bottom
- Aluminum interior with coved corners and finished edges

Front-of-house restaurant staff have always needed to be ready at all times for the next rush. And, now, with the recent growth of carry-out, drive-thru, and delivery, it's never been more critical to have prepared meals or beverages readily available and within reach. Silver King shelf refrigerators offer the cool solution your operation needs, without the full-size price tag.

Versatile Design

The compact design of a shelf refrigerator provides restaurants the ability to position pre-made orders near pickup and delivery locations, which help increase speed of service. Use to store beverages, salads, and other to-go meals — this versatile, cost-effective unit brings refrigeration to the front-of-house.

Eco-Friendly Refrigerant

All Silver King equipment features R290 refrigerant, one of the most environmentally friendly choices with a global warming potential (GWP) of 3. R290 is proven safe, readily available, and familiar to service teams.

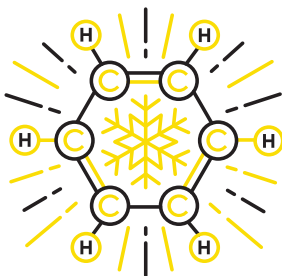

Lightweight, Durable Construction

The stainless steel exterior and interior, plus galvanized back and bottom, provide maximum durability while still being lightweight.

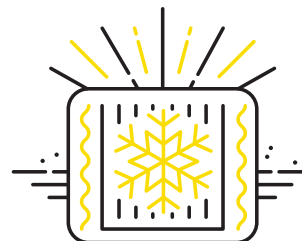

Easy to Clean

The aluminum interior with coved corners, finished edges, plus easy lift-out shelves make cleaning simple.

High-Efficiency Refrigeration System

Forced air circulation provides a uniform temperature throughout the cabinet to ensure a consistent product temperature every time.

High-Density Insulation

Foamed-in-place, CFC-free polyurethane insulation keeps cold air in while strengthening the overall unit — improving overall cost savings.
